

Open Lecture - Wednesday 25 May h. 16.00
Aula Pedefferri - Edificio 6

Strategy making as a pathway to policy integration and collaborative landscape planning. Framework and solutions with examples from recent experimental projects in Denmark.

Professor **Jørgen Primdahl**
Associate professor **Lone S. Kristensen**
Landscape Architecture and Planning

Landscape strategy making in a globalized world – between conflict management and place making. How more or less globalized driving forces including, climate change, biodiversity decline, agricultural developments, urbanization in various forms, and public policies increasingly affect the local landscape. And how strategy making represents a way to bring a complex mix of policy goals and stakeholders together in collaborative processes.
