RESilienceLAB/ Urban Curator TAT/ IMM designLAB  
Angela Colucci/Giulia Pesaro [RESilienceLAB/DABC Politecnico di Milano]

### URBAN RESILIENCE TALKS

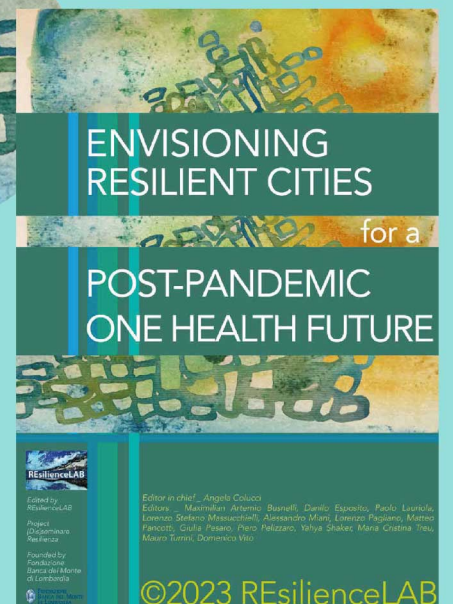

The talk originates from the emerging issues during the collective writing process of the book *Envisioning Resilient Cities for a Post-pandemic One Health Future* to foster the dialogue on strategic assets to face the Anthropocene challenges and urban resilience.

The debate will focus on strategic issues presented by the book Authors and enriched by the speech presented by Prof. Xinhao Wang of the University of Cincinnati.

The morning is organized in talks rounds presenting/discussing the emerging crosscutting aspects for alliance among disciplinary approaches towards common advancements in supporting urban envisioning and transformation processes to enhance resilience and planetary health.

### THE BOOK

the book is an opensource publication by RESilienceLAB downloadable @ <https://resiliencelab.eu/en/products/>

Event organization: Angela Colucci [angela.colucci@polimi.it]
